Research Assistantship

 Governing the Data Economy

This research assistantship offers a Harvard College student the opportunity to work with a John F. Kennedy Memorial Fellow on the following research project.

The project investigates policy responses to challenges that result from an emerging data economy. It studies relevant developments in the US and the European Union, looking at how policy makers address questions of consumer data privacy, data protection, and accountable algorithms. For this purpose, the project will analyze actor coalitions, their policy ideas, and how these develop over time.

Research Tasks

- Search relevant policy documents, legislation etc.
- Browse parliamentary debates
- Extract and systematize information
- Review literature

Requirements (desirable, but not necessary)

- Basic knowledge of and interest in digital policy
- Basic knowledge of European Union Politics
